

Item number: AMT-4 Installation 001 - Ole

|| Cable Cover 001 ||

Patent pending

If you're facing a challenge,
invite us on the journey
toward a solution. Let's gain
insights together.
We design to meet real needs
and requirements.

Technical Specifications

Mounting Options	Wall-mounted, with magnets on steel surfaces or adhesive, screws, etc.
Dimensions / Size	From 400-1000 mm – can be mounted in extension of each other
Material	Powder-coated galvanized sheet metal
Surface(s)	Smooth powder-coated surface

The cable cover covers plugs and outlets while also allowing excess cables to be hidden within a closed enclosure. Each unit can be adapted to specific needs, such as accommodating cable diameters from 3-8 mm or providing space for a transformer, specialized outlets, or similar components. The front cover is hinged and features a replaceable rubber gasket as a backstop for the seal, making cable routing adjustments a relatively simple task.

The cover is wall-mounted using magnets, screws, adhesive, or similar methods. Its large mounting surface also enables installation on soft or lightweight walls.

User Requirements

This cable cover is one of many products designed in collaboration with users from the pharmaceutical industry.

- Conceal excess cables, reducing potential dust and debris accumulation in the facility
- A reusable solution for easy cable and instrument management without major modifications
- Smooth, sloped, or vertical surfaces, preferably in white.
- Conceal cables, transformers, and similar components for easier and faster facility cleaning

ALMOTEC™ develop and manufacture functional equipment for the pharmaceutical industry (e.g., cleanrooms), laboratory environments, and the food industry. Our made-to-order production enables us to meet specific requirements for capacity, dimensions, and considerations for other installations.
